## WHO ARE WE?

At Qudra-Tech, we are deeply committed to provide effective and customer-oriented solutions that meet and exceed customer expectations. The Company is established with a purpose to provide intelligent and reliable services in the fields of Information Technology and Telecommunications, Qudra-Tech serves clients across the GCC and North Africa.

With extensive expertise and a management team with over 25 years of collective experience, Qudra-Tech has been established with the goal of delivering intelligent and reliable customer-oriented solutions in Information Technology and Telecommunications to the GCC and North African markets.

Qudra-Tech Information Technology was established to leverage the extensive opportunities in the communications and IT sectors within KSA.

As a financially stable company, Qudra Tech has gained significant strength and experience in the local market, allowing us to cultivate excellent relationships.

Our proven performance and trusted reputation have positioned us as a preferred provider among top corporate entities in the kingdom, including major banks, government ministries, and key service organizations such as power utilities, water supply authorities, oil industries, and the industrial sector.

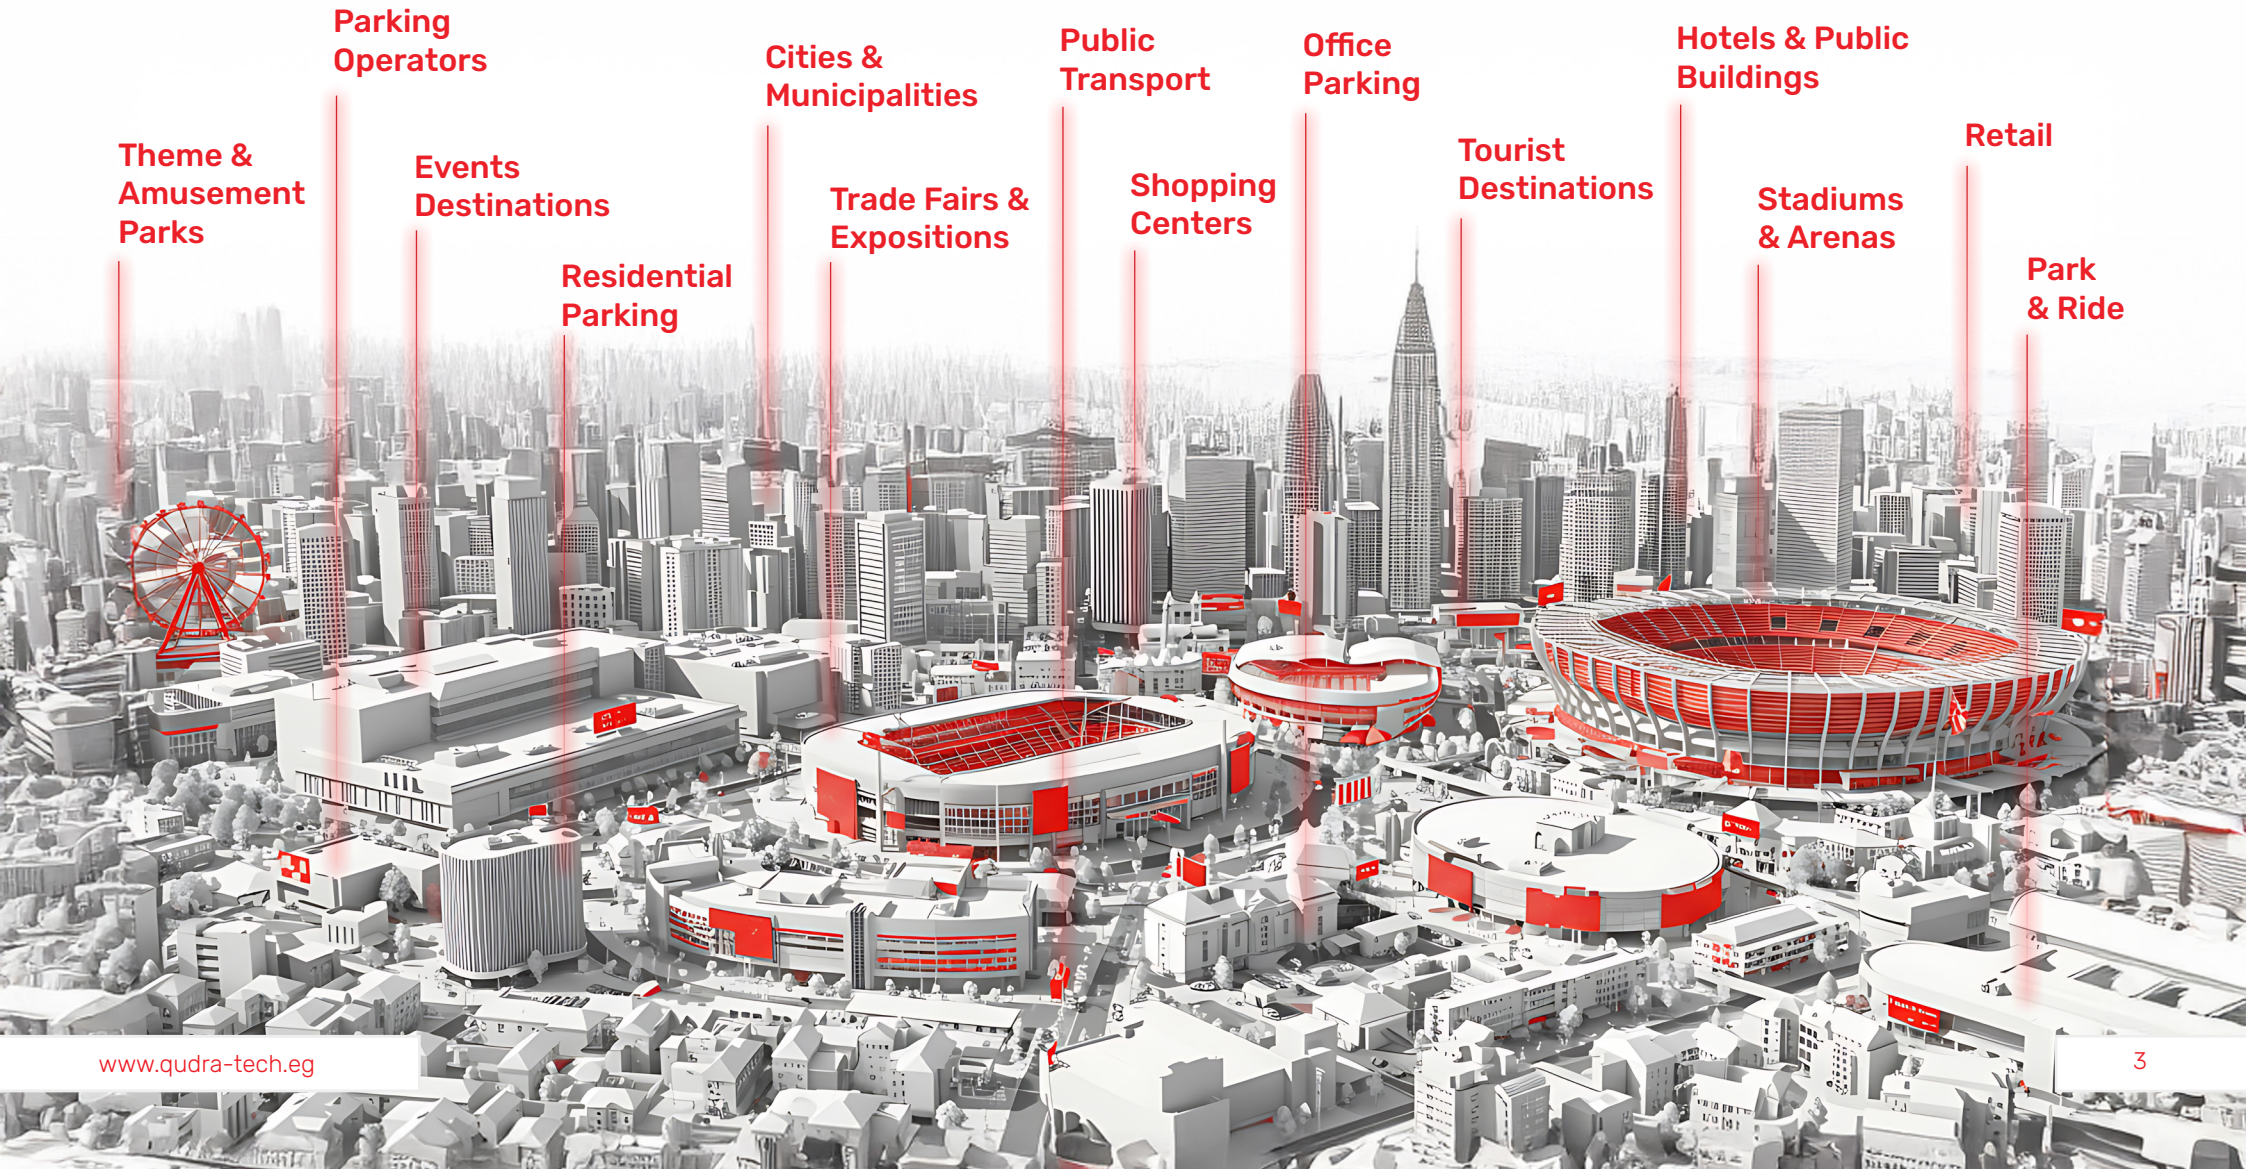

## OUR ADDED VALUE

To deliver exceptional IT business solutions and services, guided by our core values, to positively impact the lives of our clients, employees, partners, shareholders, and the broader community in our region.

## YOUR ACCESS TO INTEGRATED SECURITY SOLUTIONS

- ◆ With branches in Saudi Arabia, UAE and Cairo, Egypt. Qudra-Tech delivers cutting-edge integrated technology solutions that optimize operations and enhance business transactions.
- ◆ With over 25 years of combined experience, our expert team is committed to providing intelligent, reliable, and client-focused IT and telecommunications solutions.
- ◆ We offer hardware, integrated systems, portals, business intelligence, enterprise application integration, and application development outsourcing for clients across the government, education, telecom, retail, and the private sector in the Middle East.

## OUR SOLUTIONS

### ◆ Q-FINDER SOLUTION

Q-Finder is a cloud-based RFID UHF tracking and locator system designed to efficiently manage and locate documents, assets, and people within offices or buildings. By reducing the time, cost, and stress associated with manual tracking, Q-Finder helps businesses maintain organized archives and meet security regulations—all through patented, easy-to-use technology.

### ◆ Q-TIME

Q-Time is a cloud-based time and attendance system that enables the accurate, secure, and cost-effective tracking of employee work hours. Employees can check in and out using mobile devices or biometric readers. With remote access and real-time control, Q-Time simplifies workforce management from anywhere.

### ◆ Q-STOCK

Q-Stock is a Virtual RFID Portal/Tunnel solution that automates item registration in warehouses and distribution centers. It enhances the efficiency of inbound, commissioning, and dispatch processes by accurately reading RFID-tagged items as they pass through automated gates or conveyor systems.

### ◆ Q-VISITOR

Q-Visitor is a user-friendly RFID-based visitor management system designed to organize events, track visitors, and manage access control across gates and zones. Suitable for organizations of all sizes, it supports multiple branches and departments, creating profiles for both host employees and visitors while storing event logs for easy tracking.

# OUR PRODUCTS

# SKIDATA<sup>®</sup>

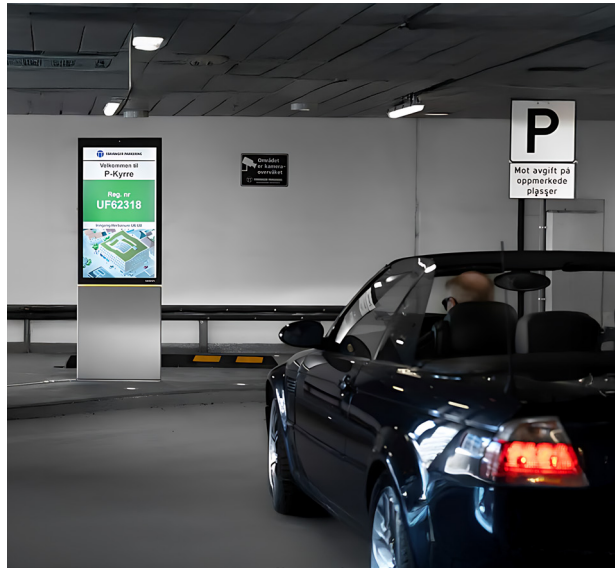

SKIDATA is the global leader in access and revenue management, providing both standard and customized solutions that ensure fast, secure access for people and vehicles. With over 10,000 installations in 100+ countries, SKIDATA enhances access to locations like ski resorts, airports, stadiums, malls, and more.

The system also supports advanced vehicle access management, including pre-reserved parking spaces, to ensure a seamless and positive experience from entry to exit.

SKIDATA AG is a global leader in access solutions and visitor management, offering over 10,000 systems worldwide. These systems ensure fast, secure access for people and vehicles in locations like ski resorts, shopping centers, airports, cities, stadiums, and amusement parks. SKIDATA provides turnkey solutions from a single source.

## ◆ ACCESS AND VISITOR MANAGEMENT COST CONTROL

SKIDATA's success is built on a dedicated team of over 1,350 employees across 26 countries, with a strong focus on research and development. The company emphasizes responsibility and sustainability, leveraging the global network of the Swiss-US based Kudelski Group. Headquartered in Salzburg, Austria, SKIDATA operates in over 100 countries through 26 subsidiaries and numerous partners.

## ◆ SYSTEM CONTROLLING ADMINISTRATION

SKIDATA offers customers access to a vast network of innovative technologies and thousands of patents, including over 100 of its own patent families. Additionally, through licensing agreements with major companies like Google, Cisco, and Bloomberg, SKIDATA provides solutions and innovations that add significant value to your business operations.

## ◆ MONITORING AND MAINTENANCE SERVICES

SKIDATA is a leader in both access and revenue management, as well as industry innovation. With around 200 developers at three development sites, SKIDATA is committed to continuously delivering innovations for its customers.

# PARKING MANAGEMENT SKIDATA

## ◆ POWER GATE

The Power Gate is a versatile parking column offering modern ticketing technologies, including touch-free RFID and barcode systems for reliable access. It suits any budget and provides advertising opportunities for additional revenue, making it ideal for expanding business models and integrating into urban solutions.

## ◆ LITE GATE

Lite Gate is a compact, smart ticket reader offering RFID and barcode solutions for easy access. It features a sleek design with high-quality materials that blend into any architecture. Bi-directional video communication and expert-optimized guidance enhance user experience. The column also provides advertising opportunities for additional revenue.

# SKIDATA PRODUCTS

## ◆ BARRIER GATE

Barrier Gate enhances your parking area's first impression with a sleek, modern design and advanced functionality. It offers standard booms up to 4.5 meters or illuminated jointed arms. Integrated lane signals display symbols to guide customers, improving orientation and overall user experience.

## ◆ SKIOSK® SLIM 'PARKING'

Skiosk Slim 'Parking' is a sleek, cashless digital kiosk designed for quick payments. Ideal for business centers, airports, shopping malls, and hotels, it functions as an all-in-one control dashboard, information hub, and advertising panel.

## ◆ SKIOSK® SMART 'PARKING'

Skiosk Smart 'Parking' combines user-friendly design with advanced technology. It offers versatile ticketing, RFID media delivery, online ticket pick-up, and central customer service, enhancing your business opportunities.

# SKIDATA (STADIUM & ARENA)

## ◆ ARENA GATE

Enhanced security with Full-height turnstiles. The new gate for stadiums and all types of recreational facilities provides optimum protection against unauthorized access.

## ◆ FLEX. GATE 'EVENT'

The newly designed Flex. Gate not only looks good; it reads multiple types of access media and boasts simple maintenance. In addition, Flex. Gate adjusts to your needs with a customized configuration of modules and can be retrofitted at any time- all of this delivered with time-tested SKIDATA quality.

# DASHBOARD GATE

Deliver relevant content and targeted marketing directly in the entry lane for better-informed and more satisfied customers.

- ◆ SUITABLE FOR ALL ENVIRONMENTS
- ◆ INCREASE TURNOVER
- ◆ RELIEVE YOUR PERSONNEL
- ◆ SIMPLE OPERATION

SKIDATA

# ***HIKVISION***<sup>®</sup>

Hikvision addresses the growing need for efficient parking management in urban areas by offering advanced solutions for controlling vehicle access and optimizing parking flow.

# PARKING MANAGEMENT SYSTEM

## ◆ Barrier Gate

Offers safe, efficient operation with minimal maintenance, featuring a brushless DC motor for smooth, quiet control and flexible design options.

## ◆ ANPR Camera

Enhances security and traffic flow with an efficient license plate recognition algorithm and advanced wide-angle detection for better capture rates.

## ◆ All-in-One Entrance & Exit Manager

Integrates multiple systems, including ANPR cameras, barrier gates, lighting, radar, and voice prompts, with an anti-tailgating mode to ensure swift and secure passage.

## PARKING GUIDANCE SYSTEM

**Parking Guidance Camera:** Automates space detection and monitoring with high recognition rates using license plate recognition. It features multicolor LED lights for clear status indication and supports multiple parking space statuses, ensuring simplified installation and maintenance.

**Fisheye Parking Guidance Camera:** Improves parking efficiency with deep learning-based detection, covering up to 16 spaces or 8 spaces with 2-channel monitoring. It also supports a PoE interface for easy installation.

Park Assist is leading in data-driven innovation, transforming parking guidance systems (PGS) into a customer-centric experience. Beyond just guiding parkers to available spaces, the system enhances the entire parker journey, focusing on improving the overall customer experience (CX).

# PARK ASSIST SYSTEM

## ◆ PARKING GUIDING SYSTEM

Enhance security and surveillance with **M5 smart sensors** for up to 6 spaces, providing real-time monitoring. Integrate License Plate Recognition and INX software for customer behavior reports and parking garage usage patterns. INX's expandability allows for seamless integration with third-party solutions, ensuring frictionless parking without interruptions.

## ◆ PARKING GUIDANCE LED SCREEN

The next-generation automated parking guidance system (APGS) offers a premium parking experience for parkers. It reduces drive time and emissions, reducing stress and anxiety. Parkers can save up to 63% on parking time, and Park Finder, an advanced vehicle locator, creates a lasting impression of the business.

**Galaxy Control Systems Access Control**

Galaxy Control Systems offers advanced electronic access control solutions that go beyond traditional locks and keys. Their systems manage and track who can enter specific areas, when, and through which doors—enhancing security for employees, assets, and facilities. With flexible, real-time access privileges and activity tracking, these solutions help prevent theft, vandalism, and workplace violence, making security smarter and more efficient.

**Galaxy 635 Series Control Panel**

The Galaxy 635 Series Control Panel offers flexible, expandable, and complete access control solutions. It integrates seamlessly with System Galaxy software and supports a wide range of technologies—access control, biometrics, surveillance, alarms, visitor management, and more. Its modular design allows for custom configurations without over-purchasing equipment. Compatible with various card and reader technologies, the system ensures cost-effective scalability. Built in the USA, Galaxy guarantees high quality, long-term compatibility, and reliable security performance.

# TagMaster

LEARN FROM REALITY

TagMaster is a tech-driven company specializing in advanced identification systems using RFID and ANPR technologies for traffic and rail solutions. These systems enhance efficiency, security, and convenience in smart cities while reducing environmental impact.

## KEY PRODUCTS

LR-6

2.45 GHz RFID reader with up to 10m read range.

XT-5

High-performance UHF reader with 12m range, PoE+, self-jammer cancellation, dual Wiegand ports, and optional external antenna.

XT-1

Cost-effective UHF reader with up to 8m range, designed for easy integration into access control systems.

# SUPrema

Suprema is a global leader in biometric access control, time & attendance, and security solutions. Known for its cutting-edge biometric algorithms and advanced engineering, Suprema offers a wide range of products, including fingerprint scanners, mobile authentication, and embedded modules. The company operates in over 140 countries and holds the No.1 market share in biometric access control across the EMEA region.

# THALES

## THALES DOCUMENT READER AT9000 MK2

The Thales Document Reader AT9000 MK2 is a compact, full-page passport scanner. It's one of our best-selling document readers and probably the most familiar sight at border control desks worldwide.

CAEN RFID is a top company in the AutoID industry, specializing in UHF RFID technology for fast, long-range, and line-of-sight-free identification. Their products enable efficient, cost-effective automation.

## KEY PRODUCTS

### qIDmini (R1170I)

---

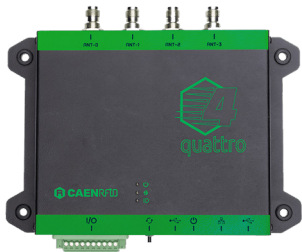

Handheld RAIN RFID reader.

### Tile (R1250I)

---

Desktop reader with integrated antenna for short/medium range.

### Quattro (R4321P)

---

Long-range compact reader for retail warehousing.

### trID (R1210I)

---

Slim desktop reader for short-range applications.

Zebra empowers teams with advanced mobility and visibility tools to support smarter decisions and future planning.

## KEY PRODUCTS

### ZT400 Series Industrial Printers

Durable printers with UHF RFID encoding.

### POS RFID Antennas

Ideal for inventory tracking in checkout or pickup areas.

### FX9600 Fixed Reader

Designed for high-volume, tough environments with top-tier performance.

### Wide-band RFID Antennas

Support global use with simplified infrastructure.

### MC3300 Series Mobile Computers

High-performance RFID readers on a robust Android platform.
